What the Guardian Sport Rehabilitator will do for YOU!

- Significantly Reduce Pain and Inflammation
- Strengthen Hamstrings and Quadriceps
 - Wear brace 90 minutes/day 30-90 days
 - Clinical studies* show quadriceps strengthen 46% and hamstrings 54%
- Improve Gait
 - Stop Limping, Walk Straight, stop Shuffling
 - Lessens strain on back, hips, knees, feet
- Easier to walk, rise from a chair, climb stairs, and get in and out of a car
- Delays progression of Knee Osteoarthritis
- Treats chronic knee pain and weakness
- Improves outcome from surgery
 - Wear 30-90 days before surgery to strengthen leg
 - Post-surgical use, combined with physical therapy, speeds recovery

- **Rotating thigh cuff** provides superior comfort and support
- Patented dynamic dual **SWING ASSIST™** facilitates initial swing phase of gait assisting the quadriceps with knee extension
- Unique adjustable **pneumatic bladder system** distracts and supports the knee joint, reducing pain and inflammation while providing exceptional support.
- **ROM control hinge** allows for precise control of extension and flexion if needed.

“Doctors told me that I would never play basketball again. Now I play regularly since I have support and I am pain free. It is by far the best sport brace I have ever had. TRY IT!”

Mark Pierce – athlete in his late 30’s (Salt Lake City, Utah)

“When I take it off, I feel like I am still wearing it – I’m already walking and feeling better after only 1 month.”

Dr. C. – orthopedic surgeon (New Jersey)

“One of my patients with “bone on bone” knee OA started wearing the Guardian Rehabilitator and reported instant reduction in pain and was able to walk again immediately with less pain.”

Dr. S. (New York City)
